

Summer KiwiSaver Scheme

Summer Growth Selection

Fund Update as at 31 December 2024

This fund update was first made publicly available on 13 February 2025.

What is the purpose of this update?

This document tells you how Summer Growth Selection has performed and what fees were charged. The document will help you to compare the fund with other funds. Forsyth Barr Investment Management Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

The Summer Growth Selection fund invests in a lesser exposure to cash and fixed interest investments and a greater exposure to equity and property investments. We aim to achieve long-term returns (before fees, taxes and other expenses) greater than a composite benchmark¹. Investors can expect high levels of movement up and down in value and, longer-term returns that are higher than those of the Summer Balanced Selection (but with more risk).

Total value of the fund	\$101,272,105
Number of members in the fund	1695
The date the fund started	8 April 2019

What are the risks of investing?

Risk indicator² for Summer Growth Selection:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at www.sorted.org.nz/tools/investor-profiler.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the five years to 31 December 2024. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the Product Disclosure Statement (PDS) for more information about the risks associated with investing in this fund.

How has the fund performed?³

	Average over past 5 years	Past year
Annual return (after deductions for charges and tax)	5.20%	10.99%
Annual return (after deductions for charges but before tax)	5.89%	11.51%
Market index annual return (reflects no deduction for charges and tax)	7.24%	15.20%

The market index return is based on a composite index made up of the indices used to measure the performance of each asset class invested in, as displayed under the target investment mix. Additional information about the market index is available on the Summer KiwiSaver scheme's entry on the offer register at www.disclose-register.companiesoffice.govt.nz

Annual return graph

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 31 December 2024.

Important: This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

What fees are investors charged?

Investors in Summer Growth Selection are charged fund charges. In the year to 31 March 2024 these were:

	<i>% of net asset value</i>
Total fund charges	0.90%
Which are made up of:	
Total management and administration charges, including	0.90%
Manager's basic fee	0.87%
Other management and administration charges	0.03%
Total performance-based fees	0.00%
Other charges	<i>Dollar amount per investor</i>
Account fee ⁴	\$36.00

Investors may also be charged individual action fees for specific actions or decisions (for example for withdrawing from or switching funds), although these are not currently charged. See the "Other Material Information" document at www.disclose-register.companiesoffice.govt.nz for more information about those fees.

Small differences in fees and charges can have a big impact on your investment over the long term.

Example of how this applies to an investor

Kim had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Kim received a return after fund charges were deducted but before tax of \$1,151 (that is 11.51% of her initial \$10,000). Kim also paid \$36 in other charges. This gives Kim a total return after tax of \$1,063 for the year.

Top 10 investments

	<i>Name</i>	<i>Percentage of fund net assets</i>	<i>Type</i>	<i>Country</i>	<i>Credit rating (if applicable)</i>
1	Intermede Global Equity Fund	13.83%	International equities	Ireland	
2	Hunter Global Fixed interest Fund	5.97%	International fixed interest	New Zealand	
3	Fisher & Paykel Healthcare Corporation Limited	2.23%	Australasian equities	New Zealand	
4	ANZ transactional bank account	1.79%	Cash and cash equivalents	New Zealand	A+
5	Precinct Properties New Zealand Limited	1.75%	Listed property	New Zealand	
6	Goodman Property Trust	1.71%	Listed property	New Zealand	
7	Auckland International Airport Limited	1.44%	Australasian equities	New Zealand	
8	Infratil Limited	1.42%	Australasian equities	New Zealand	
9	Kiwi Property Group Limited	1.21%	Listed property	New Zealand	
10	Contact Energy Limited	1.20%	Australasian equities	New Zealand	

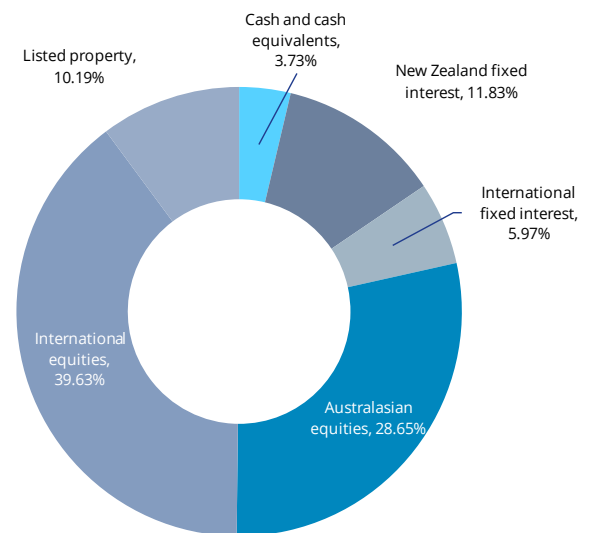

The top 10 investments make up 32.54% of the fund.

Foreign currency exposures associated with international fixed interest are hedged to the New Zealand dollar. We actively manage the fund's foreign currency exposures associated with international and Australian equities, and listed property. As at 31 December 2024, these exposures represented 53.13% of the value of the fund. After allowing for foreign currency hedges in place, 21.75% of the value of the fund was unhedged and exposed to foreign currency risk.

What does the fund invest in?

This shows the types of assets that the fund invests in.

Actual investment mix

Target investment mix

Cash and cash equivalents	4.00%

Further information

You can also obtain this information, the PDS for the Summer KiwiSaver scheme, and some additional information from the offer register at www.disclose-register.companiesoffice.govt.nz.

Notes

- ¹ The composite benchmark for the Summer Growth Selection is made up of the single asset class benchmarks weighted by the target asset allocation for the asset class. The single asset class benchmarks are the same as the benchmarks for our single asset class funds. The current weightings are as per the target investment mix referenced in this update under "What does the fund invest in?".
- ² The Summer Growth Selection now follows the same investment strategy as the Octagon Growth Fund (which is a related fund also managed by Forsyth Barr Investment Management Limited). We have elected to use the risk indicator from the Octagon Growth Fund because we consider it provides a more reliable reflection of the volatility of the Summer Growth Selection. This is because the Octagon Growth Fund calculates the risk indicator based on weekly rather than monthly data points which can yield different results. Weekly data provides a better estimate of volatility and is the preferred approach under the Financial Markets Conduct Regulations 2014. However, because the Octagon Growth Fund came into existence on 11 December 2020, the risk indicator for that fund is based, in part, on market index returns data for periods before that date, and actual fund returns data afterwards. Using market index returns data may make the risk indicator a less reliable indicator of how much values might go up and down in the future.
- ³ Summer KiwiSaver scheme was previously known as the Forsyth Barr KiwiSaver Scheme - you can find a link to historical performance information for the funds in the Forsyth Barr KiwiSaver Scheme at <https://www.summer.co.nz/the-summer-scheme/performance-information/quarterly-fund-updates/>.
- ⁴ The account fee is charged at \$3 per member, per month.
- ⁵ Octagon Asset Management Limited is responsible for the day-to-day investment decisions for the fund.
