What are the risks of investing?

Risk indicator¹ for Summer Listed Property:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at www.sorted.org.nz/tools/investor-profiler.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the five years to 30 September 2024. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the Product Disclosure Statement (PDS) for more information about the risks associated with investing in this fund.

Notes

- ¹ The Summer Listed Property Fund invests in listed financial products issued by entities whose principal business involves the owning or managing of property, property-like assets or real assets through a related underlying fund. We have elected to use the risk indicator from the underlying fund because we consider it provides a more reliable reflection of the volatility of the Summer Listed Property Fund. This is because the underlying fund calculates the risk indicator based on weekly rather than monthly data points which can yield different results. Weekly data provides a better estimate of volatility and is the preferred approach under the Financial Markets Conduct Regulations 2014.
